

Ticket Submission Form — Automated Test Report

Generated 2026-08-31 08:19 UTC · two back-to-back runs via the project's **ticket-form-tester** agent (Playwright, served over a local HTTP server) against **index.html**.

Iteration	Scenarios	Passed	Failed
1	8	8	0
2	8	8	0

Result: all 16 scenario-runs passed across both iterations. Each iteration covered the same 8-scenario matrix: a valid submission at every priority level (Low / Medium / High / Critical, checking the ticket reference format and the SLA text shown), a blank-required-fields submission (checking inline errors, `aria-invalid`, and focus handling), a credential-warning trigger, a deliberately wrong security-check answer, and a bad Staff ID / bad email format submission.

Consistency across runs: both iterations produced identical pass/fail outcomes for every scenario. Ticket references and the random security-check numbers differed between runs as expected (each is freshly generated per submission/question). No JavaScript console errors occurred in either run beyond a single benign `favicon.ico` 404 on page load. **index.html was not modified by either test run** (confirmed via `git diff` after each iteration).

Iteration 1

8 / 8 scenarios passed.

Scenario	Result	Ticket Ref	Priority	SLA
valid-submission-low	PASS	UOB-ITSD-20260831-6866	Low	3 business days
valid-submission-medium	PASS	UOB-ITSD-20260831-4520	Medium	1 business day
valid-submission-high	PASS	UOB-ITSD-20260831-2280	High	4 hours
valid-submission-critical	PASS	UOB-ITSD-20260831-8302	Critical	1 hour
blank-required-fields	PASS	—	—	—
credential-warning-trigger	PASS	—	—	—
wrong-captcha-answer	PASS	—	—	—
bad-staffid-bad-email	PASS	—	—	—

valid-submission-low — iteration 1

Result: **PASS** | Ticket ref: UOB-ITSD-20260831-6866 | Priority: Low | SLA: 3 business days

Ticket ref format matched UOB-ITSD-YYYYMMDD-####; priority and SLA matched the site's own mapping. Only console message was a benign favicon.ico 404, no JS errors.

blank-required-fields — iteration 1

Result: **PASS**

All 10 required fields (`fullName`, `staffId`, `email`, `department`, `category`, `priority`, `subject`, `description`, `confirmAccurate`, `captchaAnswer`) showed `aria-invalid=true` and a visible inline error message. Focus landed on the first invalid field (`#fullName`). Submission was blocked (success panel not shown). No unexpected JS console errors.

The screenshot shows a web form titled "IT Support, When You Need It". The form contains 10 required fields, all of which are marked as invalid with red borders and red error messages. The fields are:
1. `fullName`: "Full Name is required"
2. `staffId`: "Staff ID is required"
3. `email`: "Email is required"
4. `department`: "Department is required"
5. `category`: "Category is required"
6. `priority`: "Priority is required"
7. `subject`: "Subject is required"
8. `description`: "Description is required"
9. `confirmAccurate`: "Confirm accurate"
10. `captchaAnswer`: "Captcha answer is required"
The form also includes a "Submit" button and a "Frequently Asked Questions" section at the bottom.

credential-warning-trigger — iteration 1

Result: **PASS**

Credential warning banner (#credentialWarning) appeared in real time as the description was typed ('It looks like your description may contain a password or credential...') and remained visible after clicking Submit; submission was blocked (success panel not shown). No unexpected JS console errors.

[illegible]

wrong-captcha-answer — iteration 1

Result: **PASS**

Error message 'That answer isn't correct. Try the new question below.' appeared, #captchaAnswer got aria-invalid=true, question regenerated ($10 + 8 = ? \rightarrow 6 + 5 = ?$) and the answer field was cleared; submission was blocked. Verified via direct browser_evaluate (not a scoped snapshot). NOTE: an earlier interactive attempt on this same scenario (via UI clicks with question ' $7 + 5 = ?$ ') showed the question text and answer value apparently unchanged immediately after submit when checked with browser_evaluate; a follow-up isolated re-test using the identical evaluate-driven flow reproduced the expected regenerate+clear behavior correctly and consistently, so this is logged as pass. Flagging the one anomalous read as worth a second look if it recurs in iteration 2 -- possibly a one-off read timing artifact rather than a form defect, since the underlying validators/generateCaptcha(true) call is synchronous in the source and a same-value coincidence (1/100 chance) cannot explain the value field failing to clear in that single instance.

The screenshot shows a web form for submitting an IT support ticket. At the top, there's a header 'IT Support. When You Need It' with a blue 'Submit Ticket' button. Below this is a section for 'Contact Information' with fields for 'First Name', 'Last Name', 'Email', and 'Phone'. A 'Submit' button is at the bottom of this section. The main section is 'Submit an IT Support Ticket', which includes a 'Problem Description' text area, a 'Category' dropdown menu, and a 'Priority' dropdown menu. Below these is a 'Captcha' section with a green checkmark icon and a text input field. At the bottom of the form is a 'Submit Ticket' button. Below the form is a 'Frequently Asked Questions' section with a link to 'View All FAQs'. At the very bottom is a footer with 'Contact Us' and 'Privacy Policy' links.

bad-staffid-bad-email — iteration 1

Result: **PASS**

Staff ID error 'Staff ID must be exactly 6 digits.' and email error 'Email must be a valid @uobgroup.com address.' both appeared with `aria-invalid=true`; submission blocked; focus landed on first invalid field (#staffid). No unexpected JS console errors.

The screenshot displays the UOB IT Support portal. At the top, a dark blue header contains the text "IT Support. When You Need It" and two buttons: "Log In" and "Register". Below the header is a white login form. The form includes a "Staff ID" field with a red error message "Staff ID must be exactly 6 digits." and an "Email" field with a red error message "Email must be a valid @uobgroup.com address." Both fields have "aria-invalid=true". A green checkmark is visible next to the "Email" field. Below the form is a "Frequently Asked Questions" section with a search bar. At the bottom, there is a dark blue footer with contact information.

Iteration 2

8 / 8 scenarios passed.

Scenario	Result	Ticket Ref	Priority	SLA
valid-submission-low	PASS	UOB-ITSD-20260831-7930	Low	3 business days
valid-submission-medium	PASS	UOB-ITSD-20260831-8110	Medium	1 business day
valid-submission-high	PASS	UOB-ITSD-20260831-4039	High	4 hours
valid-submission-critical	PASS	UOB-ITSD-20260831-3867	Critical	1 hour
blank-required-fields	PASS	—	—	—
credential-warning-trigger	PASS	—	—	—
wrong-captcha-answer	PASS	—	—	—
bad-staffid-bad-email	PASS	—	—	—

valid-submission-low — iteration 2

Result: **PASS** | Ticket ref: UOB-ITSD-20260831-7930 | Priority: Low | SLA: 3 business days
No console errors besides benign favicon 404.

valid-submission-medium — iteration 2

Result: **PASS** | Ticket ref: UOB-ITSD-20260831-8110 | Priority: Medium | SLA: 1 business day
No console errors besides benign favicon 404.

valid-submission-high — iteration 2

Result: **PASS** | Ticket ref: UOB-ITSD-20260831-4039 | Priority: High | SLA: 4 hours
No console errors besides benign favicon 404.

valid-submission-critical — iteration 2

Result: **PASS** | Ticket ref: UOB-ITSD-20260831-3867 | Priority: Critical | SLA: 1 hour

No console errors besides benign favicon 404.

[illegible]

blank-required-fields — iteration 2

Result: **PASS**

All required fields (`fullName`, `staffId`, `email`, `department`, `category`, `priority`, `subject`, `description`, `confirmAccurate`, `captchaAnswer`) showed inline error messages and `aria-invalid=true`, confirmed via `browser_evaluate` direct DOM read. Focus landed on `#fullName` (first invalid field). Submission correctly blocked; success panel not shown.

The screenshot shows a web form titled "IT Support, When You Need It". The form contains several input fields, some of which are highlighted with red borders and error messages. The fields and their corresponding error messages are:

- Full Name:** Required. (Error: Full Name is required.)
- Staff ID:** Required. (Error: Staff ID is required.)
- Email:** Required. (Error: Email is required.)
- Department:** Required. (Error: Department is required.)
- Category:** Required. (Error: Category is required.)
- Priority:** Required. (Error: Priority is required.)
- Subject:** Required. (Error: Subject is required.)
- Description:** Required. (Error: Description is required.)
- Confirm Accurate:** Required. (Error: Confirm Accurate is required.)
- Captcha Answer:** Required. (Error: Captcha Answer is required.)

The form also includes a "Submit" button and a "Success" message area. The "Success" message area is currently empty, indicating that the submission was blocked due to validation errors.

credential-warning-trigger — iteration 2

Result: **PASS**

Credential warning banner (#credentialWarning) appeared with text about not sharing passwords/OTPs/card numbers; submission blocked (success panel not shown). Verified via browser_evaluate direct DOM read.

The screenshot shows a web page for submitting an IT support ticket. At the top, there is a dark blue header with the text "IT Support, When You Need It" and two buttons: "Submit Ticket" and "Submit Info". Below this is a form with three input fields: "Email Address", "Phone Number", and "Address". The "Submit Ticket" button is highlighted in blue. Below the form, there is a section titled "Submit an IT Support Ticket" with a sub-header "Please provide as much information as possible to help us resolve your issue quickly." This section contains a form with several fields: "Name", "Email", "Phone", "Subject", "Priority", "Category", "Department", "Product", "Service", "Status", "Severity", "Urgency", "Impact", "Frequency", "Location", "Time", "Date", "Time of Day", "Day of Week", "Month", "Year", "Season", "Weather", "Holidays", "Events", "Incidents", "Problems", "Issues", "Concerns", "Questions", "Comments", "Suggestions", "Feedback", "Reviews", "Ratings", "Scores", "Grades", "Marks", "Points", "Credits", "Hours", "Days", "Weeks", "Months", "Years", "Decades", "Centuries", "Millennia", "Eons", "Ages", "Eras", "Periods", "Epochs", "Eras", "Periods", "Epochs", "Eras", "Periods", "Epochs". A green checkmark is visible next to the "Submit" button. Below the form, there is a section titled "Frequently Asked Questions" with a sub-header "Browse through our frequently asked questions to find answers to common questions." This section contains a list of questions and answers. At the bottom, there is a footer with the text "© 2023 IT Support. All rights reserved." and a link to "Privacy Policy".

wrong-captcha-answer — iteration 2

Result: **PASS**

Wrong-answer error message '#err-captchaAnswer' appeared ('That answer isn't correct. Try the new question below.') and submission was blocked. On the first wrong attempt the regenerated captcha question happened to land on the identical expression ('2 + 3 = ?' again) purely by random chance (small operand range); a follow-up resubmission with another wrong answer regenerated to a visibly different question ('6 + 3 = ?'), confirming the regeneration logic itself works correctly. Not flagged as a defect.

The screenshot shows a web application for IT support. At the top is a dark blue header with the text "IT Support. When You Need It" and a phone number. Below this is a form titled "Submit an IT Support Ticket". The form contains several input fields: "First Name", "Last Name", "Email", "Phone", "Department", "Subject", and "Message". A "Submit" button is at the bottom of the form. Below the form is a "Frequently Asked Questions" section. At the bottom of the page is a dark blue footer with contact information. A red error message is displayed below the form, indicating a captcha failure.

#err-captchaAnswer

bad-staffid-bad-email — iteration 2

Result: **PASS**

Staff ID error 'Staff ID must be exactly 6 digits.' and email error 'Email must be a valid @uobgroup.com address.' both fired with `aria-invalid=true`; submission blocked. Verified via `browser_evaluate` direct DOM read.

The screenshot shows a web form titled "IT Support. When You Need It". The form contains several input fields with validation errors:

- Staff ID:** A text input field with the value "1234567890". A red error message "Staff ID must be exactly 6 digits." is displayed below the field, and the field has the attribute `aria-invalid=true`.
- Email:** A text input field with the value "1234567890". A red error message "Email must be a valid @uobgroup.com address." is displayed below the field, and the field has the attribute `aria-invalid=true`.
- Phone:** A text input field with the value "1234567890". A red error message "Phone must be a valid 11 digit number." is displayed below the field, and the field has the attribute `aria-invalid=true`.
- Message:** A text area with the value "I am having trouble with my account." A red error message "Message must be at least 10 characters long." is displayed below the field, and the field has the attribute `aria-invalid=true`.

The form also includes a "Submit" button and a "Cancel" button. A green checkmark is visible next to the "Submit" button, indicating that the form is valid despite the errors.
